|   | Description:                                       | language. In an attempt with a comprehensive El-   | ne current Correctional Health Assessment Records and Tracking (CHART) system for the adult and juvenile jails is over 10 years old and is written in an outdated programming nguage. In an attempt to fully digitize and modernize healthcare at the jail, the Health Care Agency (HCA) has embarked on a multi-year project to replace the CHART system ith a comprehensive Electronic Health Record system (EHR). This project will include a requirements analysis, solicitation process and the selection of a vendor to implement the vistem which will assist in providing better continuity of care for inmates housed at the Orange County Jails and Juvenile Halls. |  |   |  |  |  |  |   |  |  |  |
